## Reasoning and Problem Solving <br> Step 1: Count in 10s

## National Curriculum Objectives:

Mathematics Year 1: (1N1b) Count in multiples of twos, fives and tens
Mathematics Year 1: (1C8) Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher

## Differentiation:

Questions 1, 4 and 7 (Reasoning)
Developing Explain whether the answer is correct when given a hundred square. Counting forwards in 10s to 50.
Expected Explain whether the prediction is correct when given a hundred square.
Counting in 10s to and from 100.
Greater Depth Explain whether the prediction is correct when given a partially completed hundred square. Counting in 10s to and from 100.

Questions 2, 5 and 8 (Problem Solving)
Developing Solve a simple word problem by counting in 10s to 50 with pictorial representations to support counting.
Expected Solve a simple word problem by counting in 10 s to 100 with pictorial representations to support counting.
Greater Depth Solve a simple word problem by counting in 10 s to 100 with minimal pictorial support.

Questions 3, 6 and 9 (Reasoning)
Developing Explain if the statement is correct when finding the missing number on a marked number line that is divided into increments of 10 up to 50.
Expected Explain if the statement is correct when finding the missing number on a number line that is divided into increments of 10 to 100 (start and end are marked).
Greater Depth Explain if the statement is correct when finding the missing number on a number line that is divided into increments of 10 to 100 . Number line is labelled in words and increments other than the start and end of the number line are marked.

8b. Nicola has 100 raffle tickets.
She puts 10 tickets in each pile.

Are nine piles enough to hold all of her tickets?

9b. Tim thinks the arrow is pointing to 60.

Is he correct? Explain how you know.

## Reasoning and Problem Solving Count in 10s

## Reasoning and Problem Solving Count in 10s

## Developing

1a. Lee is incorrect. He has counted on in ones from 10.
2a. Yes, he has 40 seeds.
3a. She is not correct because the missing number is 20 .

## Expected

4a. Fi is correct. All multiples of 10 end in 0 when starting from 10.
5a. No, there are 60 cookies so she does not have enough.
6a. She is not correct because the missing number is 50 .

## Greater Depth

7a. Nina is correct. She will shade all the numbers that end with 0 .
8 a . No, he needs 8 shelves to hold 80 bottles.
9a. She is incorrect because the missing number is 20 .

## Developing

1b. Gia is incorrect. She has started from 1 instead of 10.
2b. No, she only has space for 40 teddies.
3b. He is not correct because the missing number is 10 .

## Expected

4b. Jim is incorrect. He has started at 10 and counted on 9 more, instead of 10 more.
5b.Yes, she has enough because she has 70 pens.
6b. He is not correct because the missing number is 80 .

## Greater Depth

7b. Neil is incorrect because he is counting forwards so the numbers he shades will be multiples of 10 greater than 40.

8b. No, she needs 10 piles to hold all of her tickets.
9b. He is incorrect because the missing number is 70 .
